EXAMINER'S AMENDMENT

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest an organic EL display device, in combination with the remaining features of the claims, comprising total current detection means for detecting the total current flowing to all the organic EL elements; offset voltage setting means for determining an offset voltage to offset the input image signal so as to apply a voltage which causes the current to start flowing to the organic EL elements according to a black level of the input image signal; and offset voltage control means for controlling the offset voltage, which is responsive to the offset voltage setting means, according to the total current detected by the total current detection means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Vu whose telephone number is (571) 272-1831. The examiner can normally be reached on M-F 8am-430pm.
